

This is a list of words compiled to use along with Understanding Fractions. There is a Word Bank created for each topic that can be selected from the Main Menu. Remember that each topic contains a wide variety of information that extends across different grade levels. The words that are recommended to know are words that students will be presented with as they complete the lessons. These words could be reviewed before starting a lesson, put on a word wall, included in a math dictionary or whatever else you see fit. The words students input are the words that students need to input within the software, spelled correctly, to complete a lesson. This could be used as support for students that struggle with language, or for building a word wall.

TOPIC 15: multiplication and Division of Decimals

Words Students Input	Words For Your Word Wall <i>(This is a list of words that students should have prior knowledge of OR they will know by the end of the topic)</i>
multiply thousandths tenths two four bigger hundredths smaller	fractions multiply repeated addition partial product area distributive method rectangle standard method division partial quotient fair sharing long division decimals repeating decimals rounding compare tangram square whole numbers units equal groups of sum tenths ones hundredths thousandths divide equivalent
